Orbital Speed Lowest speed 1500 2000 opm

Porter Cable 1

Sizes Available:

16oz.(BX116-16),
Gallon(BX116-G)
Color: Light Blue

Detail: Max Shine combines Brazilian Carnauba and Montan wax along with a blend of amino-functional polymers that chain together to deliver a deep, high gloss finish with superb durability. Use Max Shine as a stand alone product or as a gloss enhancer after BRITEMAX Extreme Elements. The product is quicker and easier to use than paste wax and delivers better durability and higher clarity. Leaves no greasy film residue commonly seen with thin liquid silicone waxes.

Directions For Use: Apply with a very soft foam applicator or fine micro fiber cloth thinly and evenly on the entire auto surface. For machine application use the **#5 Blue Pro Finish** pad. Make sure to buff product until almost completely dry and wipe with a soft terry or micro fiber cloth until residue is completely removed. Keep product from temperature extremes.
