#1 Pure Cut / Scratch and Heavy Swirl Removal

Medium to heavy cutting, abrasive paint compound.

Recommended Pro Finish Pad:
#1 Yellow

Rotary Speed 1700 - 3000 rpm
Orbital Speed 1700 - 2000 opm
Porter Cable 3

Sizes Available:

- 16oz.(BX111-16),
 - Gallon(BX111-G)
- Color: Yellow

Pure Cut is a lubricated compound is designed with high quality uniform abrasive materials that break down to a fine compound at a slower rate than average products so heavier scratching and swirls are effectively removed. When used with the #1 Yellow Pro Finish pad, medium and light scratches disappear from clear coat. Very fast acting and will not load up on wool or foam pads. Pure Cut is easy on the painted finish.

Effective on 1000-1500 Grit sand lines *depending on the type of paint.

Directions for Use: Shake well before use. Clean and dry all surfaces. Dispense a small amount of product on the desired surface and spread evenly using the face of the pad. Use either a soft wool pad or a heavy/medium cutting foam pad such as the BriteMax Pro Finish #1 Yellow heavy/medium cutting pad. High speed orbital provides the best results and significantly reduces probability of swirls. Do not use excessive pressure, let product do the work. Work areas to desired finish and buff dried residue with a clean dry cloth. Follow with BRITEMAX #2 Resto Max or #3 Perfect Prep to achieve the desired result.

Hand Use: Apply small amounts to surface and rub in a circular motion with a soft applicator. Buff dried residue off with a clean soft towel. Keep product from temperature extremes.
