

Leather Max / Leather & Vinyl Trim Conditioner

Cream style deep conditioner for leather and vinyl. Non-Greasy. Long lasting with a real leather scent.

Sizes Available:

- 16oz.(BX119-16),
- Gallon(BX119-G)

Color: Light Tan

Detail: Leather Max is a cream style leather and vinyl conditioner that penetrates and protects the surface delivering a long lasting, soft, non-greasy satin finish. Our special formulation penetrates the surface unlike silicone treatments that simply sit on the surface and attract dust. Leather Max increases pliability, prevents cracking and adds a pleasant leather scent. The cream style consistency allows for controlled application versus spray type products. Not for use on suede.

Directions for use: Apply small amount to clean cloth and check in a small inconspicuous location for colorfastness. Rub evenly into surface until desired area is treated. With an untreated, dry surface, dry spots may occur as Leather Max is absorbed. Reapply until surface is completely conditioned and has a consistent uniform appearance. Lightly buff with a clean dry cloth. **Professional Users:** Leather Max can be used with a conditioning brush with light pressure. Product has high absorption rate.
